Sensory Notes

The Glasshouses are filled with natural lighting and no other lighting is used apart from in the toilets where the lighting is not overly bright.

The frame of the glasshouse creates a white geometric pattern. The toilet tiles create a geometric black and white pattern.

The sound is ambient, without vocals, and will sometimes be loud.

The Glasshouses gets very hot when it's sunny outside. There are shady areas directly outside with grass, benches and picnic benches. When it's raining, the rain makes a sound on the glass roof.

There is no designated quiet space but the park space directly outside is generally quiet.

If you need support to find a quiet space, speak to the invigilator sitting at the table in the space and they will be happy to help you.

There are no overly strong scents in the Glasshouse, visitors are encouraged to refrain from using strong scented perfumes when visiting. When staff water the plants there is a scent of wet plants present in the space.

Exhibition description:

An exhibition of sculpture, sounds work that will be positioned within the Glasshouses to the right of the entrance.

What grows on the deadened log of 'the natural'? How do goodness, purity, and normality mould and decay? Who gets to determine what nature is and isn't? Unnatural* Urges turn these questions on their head and compost them into the garden. Radioactive pickle orgies! A dysfunctional family tree! Medical devices coming to life! Songs hexing the strongholds of Power!
